Pattern Development Request Management System
(TCC Template Request)

TABLE OF CONTENTS

1. General Business Process	Page 3	
2. Tasks for Requestors	Page 3	
• Register a New Pattern Request (Create New) • Track Progress & Update Material Sent Date		
3. Tasks for TCC Technical Department (Admin/Pattern Maker)	Page 5	
• Update Progress & Assign Pattern Maker • Release Finished Patterns (Release)		
4. Performance Monitoring and Analytics (Dashboard)	Page 6	
5. Advanced Features & Help	Page 8	

1. General Business Process

The system manages the state of each pattern development request according to the following workflow:

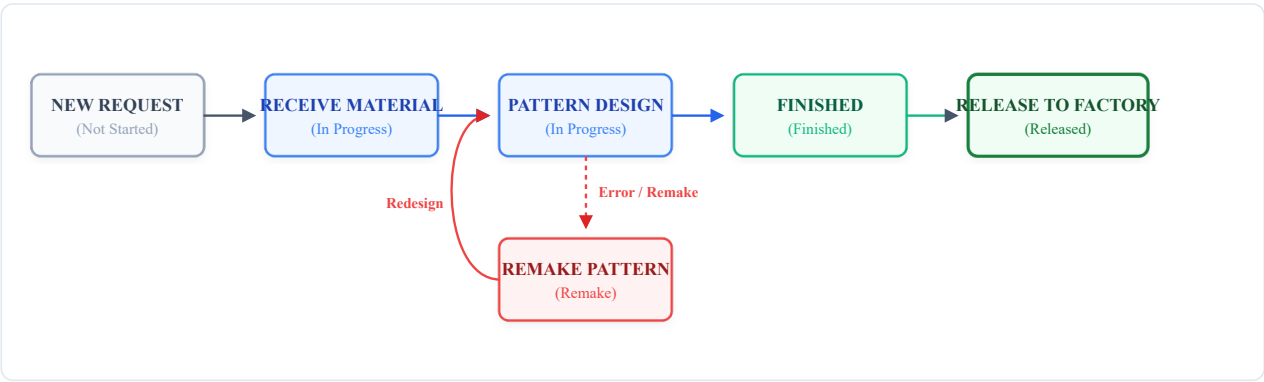

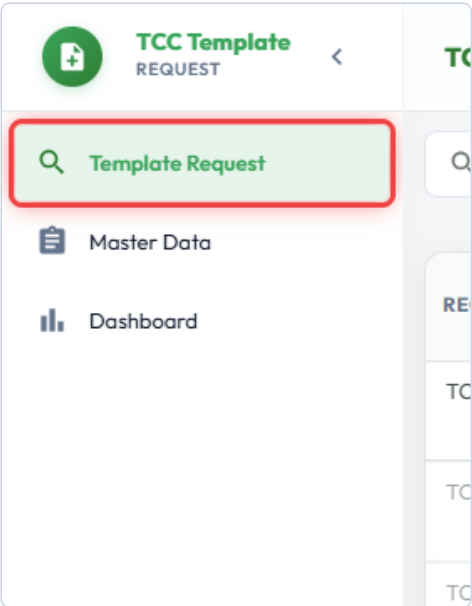

Diagram 1.1: State lifecycle workflow of a pattern development request

2. Tasks for Requestors

Task 2.1: Register a New Pattern Request (Create New)

To send a new pattern development request to the TCC technical department, follow these steps:

- 1 **Access the Request Page:** From the left navigation menu, click **Template Request**.

- 2 **Open the Registration Form:** Click **Add New** at the top right of the screen. The registration form drawer will slide in from the right.

4

Enter Technical Details:

- Select **Sample Stage** (e.g., 01 - 1st Proto, 07 - Size Set):

Standard LT: Sample Room --> 2 days for Light process, 5 days for Full process | Production --> 14 days

General Information		Production Details	
NameOfRequester shin - Nguyễn Ngọc Khả Tú	Customer (R) *	Sample stage *	Factory *
Season *	Style number *	Material sent date *	Light / Full process ** Light Process
Product type *			

- Select the target **Factory** for sample manufacturing:

Standard LT: Sample Room --> 2 days for Light process, 5 days for Full process | Production --> 14 days

General Information		Production Details	
NameOfRequester shin - Nguyễn Ngọc Khả Tú	Customer (R) *	Sample stage *	Factory *
Season *	Style number *	Material sent date *	Light / Full process ** Light Process
Product type *			

- Select the date materials are sent using the datepicker at **Material Sent Date**:

Standard LT: Sample Room --> 2 days for Light process, 5 days for Full process | Production --> 14 days

General Information		Production Details	
NameOfRequester shin - Nguyễn Ngọc Khả Tú	Customer (R) *	Sample stage *	Factory *
Season *	Style number *	Material sent date *	Light / Full process ** Light Process
Product type *			

Technical Specifications | Schedule & Priority

- Select the process complexity at **Process Type**:

Standard LT: Sample Room --> 2 days for Light process, 5 days for Full process | Production --> 14 days

General Information		Production Details	
NameOfRequester shin - Nguyễn Ngọc Khả Tú	Customer (R) *	Sample stage *	Factory *
Season *	Style number *	Material sent date *	Light / Full process ** Light Process
Product type *			

Technical Specifications | Schedule & Priority

5

Configure Machine & Size parameters:

- Enter a detailed **Operation Description**:

Standard LT: Sample Room --> 2 days for Light process, 5 days for Full process | Production --> 14 days

Technical Specifications		Schedule & Priority	
Operation Description *		Priority request No	Expected Delivery date *
Machine type*	Machine dimension *		
Sample size	Line / Quantity *		

- Fill in the **Machine Type** to be used:

The screenshot shows the 'Technical Specifications' form. The 'Machine type' field is highlighted with a red border. Other fields include 'Operation Description', 'Machine dimension', 'Sample size', and 'Line / Quantity'. The 'Schedule & Priority' section on the right shows 'Priority request' set to 'No' and 'Expected Delivery date' with a calendar icon.

- Fill in the **Machine Dimension**:

The screenshot shows the 'Technical Specifications' form. The 'Machine dimension' field is highlighted with a red border. Other fields include 'Operation Description', 'Machine type', 'Sample size', and 'Line / Quantity'. The 'Schedule & Priority' section on the right shows 'Priority request' set to 'No' and 'Expected Delivery date' with a calendar icon.

- Fill in the **Sizes Required** (e.g., *S, M, L*):

The screenshot shows the 'Technical Specifications' form. The 'Sample size' field is highlighted with a red border. Other fields include 'Operation Description', 'Machine type', 'Machine dimension', and 'Line / Quantity'. The 'Schedule & Priority' section on the right shows 'Priority request' set to 'No' and 'Expected Delivery date' with a calendar icon.

- Enter the **Line Quantity** (number of pattern pieces requested):

The screenshot shows the 'Technical Specifications' form. The 'Line / Quantity' field is highlighted with a red border. Other fields include 'Operation Description', 'Machine type', 'Machine dimension', and 'Sample size'. The 'Schedule & Priority' section on the right shows 'Priority request' set to 'No' and 'Expected Delivery date' with a calendar icon.

- Select the requested **Expected Delivery Date**:

The screenshot shows the 'Technical Specifications' form. The 'Expected Delivery date' field in the 'Schedule & Priority' section is highlighted with a red border. Other fields include 'Product type', 'Operation Description', 'Machine type', 'Machine dimension', 'Sample size', and 'Line / Quantity'. The 'Priority request' is set to 'No'.

6

Handle Urgent Requests (Priority):

- If the request is urgent, set **Is Priority** to Yes:

Product type *

Technical Specifications

Operation Description *

Machine type*

Machine dimension *

Sample size

Line / Quantity *

Schedule & Priority

Priority request
No

Expected Delivery date *

- Once set to Yes, it is mandatory to specify a clear **Priority Reason** in the input field that appears below:

Technical Specifications

Operation Description *

Machine type*

Machine dimension *

Sample size

Line / Quantity *

Schedule & Priority

Priority request
Yes

Expected Delivery date *

Priority request Reason *

- Submit Request:** Click **Submit** at the bottom of the drawer. The request will appear instantly on the tracking grid.

Machine type*

Machine dimension *

Sample size

Line / Quantity *

Cancel Submit

Task 2.2: Track Progress & Update Material Sent Date

- Search for Style No:** Enter the customer name in the quick search bar, or use the filter buttons to narrow down the tracking list:

Filter Columns Load Data

* Click **Filter** or **Load Data** to retrieve and filter requests:

Template Request					
CUSTOMER-E2E-TEST					
Filter Columns Load Data					
TID	REQUEST CREATION DATE	CUSTOMER (R)	SEASON	STYLE NUMBER	PRODUCT TYPE
26-003	2026-06-20	CUSTOMER-E...	SS26	STYLE-E2E-TEST	Jacket

Filter Columns Load Data					
R (R)	SEASON	STYLE NUMBER	PRODUCT TYPE	SAMPLE STAGE	FACTORY
R-E...	SS26	STYLE-E2E-TEST	Jacket	01-1st Proto	TCC

* Click the **Filter** button to slide open the **Advanced Filter** panel on the right side of the screen for multi-criteria filtering:

Advanced Filter

Customer (R)

Season

2 **Monitor Request Status:** Track the **Status** column on the grid to inspect progress made by the TCC technical team:

1 items

Export

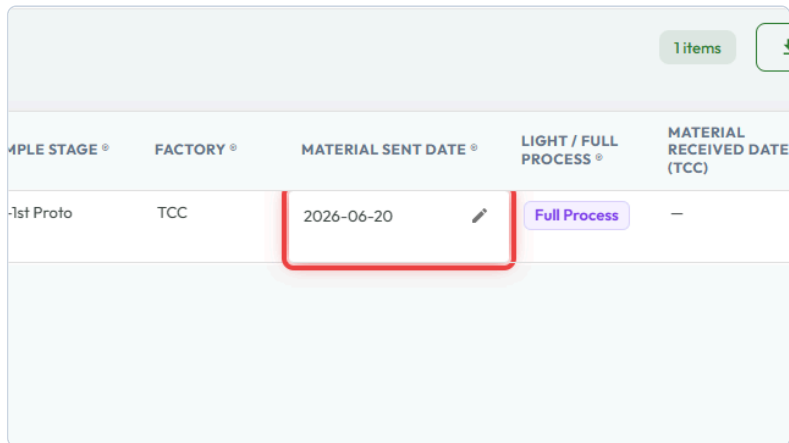

+

TORY	MATERIAL SENT DATE	LIGHT / FULL PROCESS	MATERIAL RECEIVED DATE (TCC)	OPERATION DESC
	2026-06-20	Full Process	—	Automated Screen

3

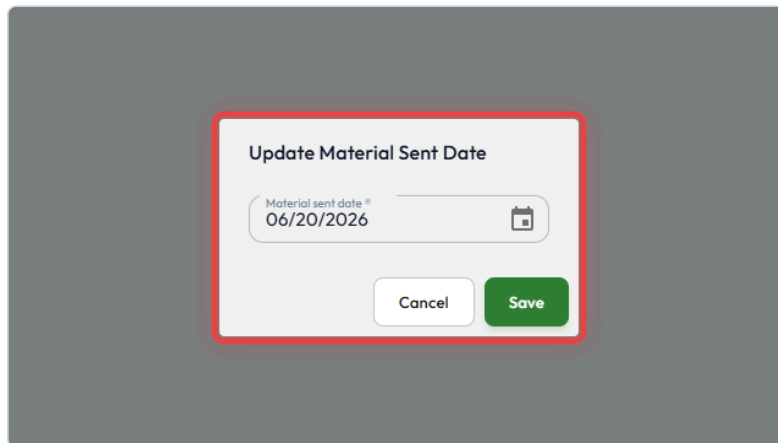

Quick Edit Material Sent Date:

- Hover over the row you want to update and double-click or click the edit pencil icon in the **Material Sent Date** column cell:

SAMPLE STAGE ®	FACTORY ®	MATERIAL SENT DATE ®	LIGHT / FULL PROCESS ®	MATERIAL RECEIVED DATE (TCC)
1st Proto	TCC	2026-06-20	Full Process	—

- A datepicker dialog will pop up. Choose the correct sent date and click Save to apply changes directly on the grid:

Update Material Sent Date

Material sent date ®
06/20/2026

Cancel Save

GUIDELINE INFO

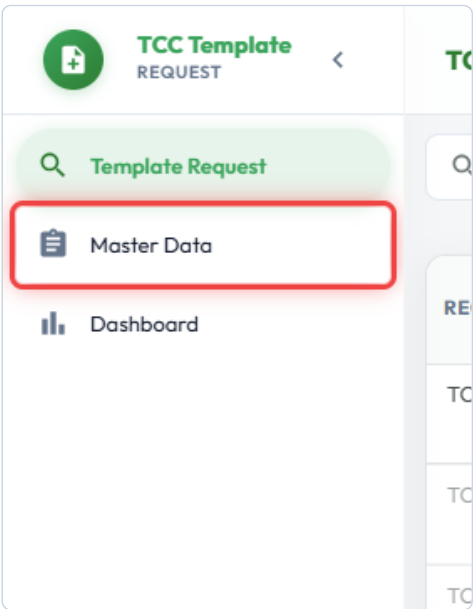

The inline quick-edit functionality for Material Sent Date is only available if your user account is authorized with editing permissions.

3. Tasks for TCC Technical Department (Admin/Pattern Maker)

Task 3.1: Update Progress & Assign Pattern Maker

Upon receiving sample materials or assigning a technician to create the pattern, follow these steps:

- 1 Access the Master Data Page: From the left navigation menu, click **Master Data**.

- 2 Open the Detail View Drawer: Double-click the request row on the grid. The detail view drawer will slide in from the right. The left panel shows the original request information submitted by requestors in read-only format:

A screenshot of a detail view drawer. The left panel contains a form with the following fields: 'Sample stage' (01 -1st Proto), 'Factory' (TCC), 'Light / Full process' (Full Process), 'Line / Quantity' (10), 'Material sent date' (2026-06-20), 'Expected Delivery date' (2026-06-25), 'Operation Description' (Automated Screenshot Generation Request), 'Machine type' (Standard), 'Machine dimension' (100x100), and 'Sample size' (S, M, L). The right panel contains three text input fields: 'reason for remake/ Delay (TCC)', 'Remarks (TCC)', and 'Released Date (TCC)'. There is a green 'Release' button next to the 'Released Date (TCC)' field.

- 3 Update Material Receipt Info:

- Select the **Material Received Date** using the calendar picker tool:

6 Save Progress: Click Save at the bottom of the form.

* The system will automatically compute and display the **Last Updated By** and **Last Updated At** audit logs at the bottom left corner of the drawer to record edits:

Task 3.2: Release Finished Patterns (Release)

When pattern drawings have been audited and passed technical checks, and the pattern is handed over to the factory workshops for bulk production:

- 1 **Open the Detail Drawer** of the request which must be in **Finished** status.
- 2 **Trigger Pattern Release:** Click **Release** at the bottom right corner of the update form:

- 3 **Confirm Data Lock:** The system will automatically record the release time in the **Released Date** field and update the request status to **Released**. At this point, the update form will be completely locked (read-only) to protect data integrity.

STYLE-E2E-TEST	Jacket	in change version (TCC)
Sample stage ⓘ 01 -1st Proto	Factory ⓘ TCC	reason for remake/ Delay (TCC)
Light / Full process ⓘ Full Process	Line / Quantity ⓘ 10	Remarks (TCC)
Material sent date ⓘ 2026-06-20	Expected Delivery date ⓘ 2026-06-25	Released Date (TCC)
Operation Description ⓘ Automated Screenshot Generation Request		Release
Machine type ⓘ Standard	Machine dimension ⓘ 100x100	
Sample size ⓘ S, M, L		

 IMPORTANT NOTE

Once the **Release** action is executed, the request record is locked permanently. No further modifications are allowed to ensure statistic and tracking reports remain strictly accurate.

4. Performance Monitoring and Analytics (Dashboard)

The **Dashboard** page helps managers monitor working efficiency and request processing speeds across the pattern development division in real-time.

- 1
- Review 8 Performance KPI Cards:** Monitor high-level metrics including total registered requests (Total Input), total finished requests (Total Output), requests currently in process (In Process) or not started (Not Started), patterns flagged for remake due to errors (Remake), the on-time completion percentage (Completion Rate), the average working days required per request (Avg Working Day), and total patterns delivered to workshops (Total Delivery):

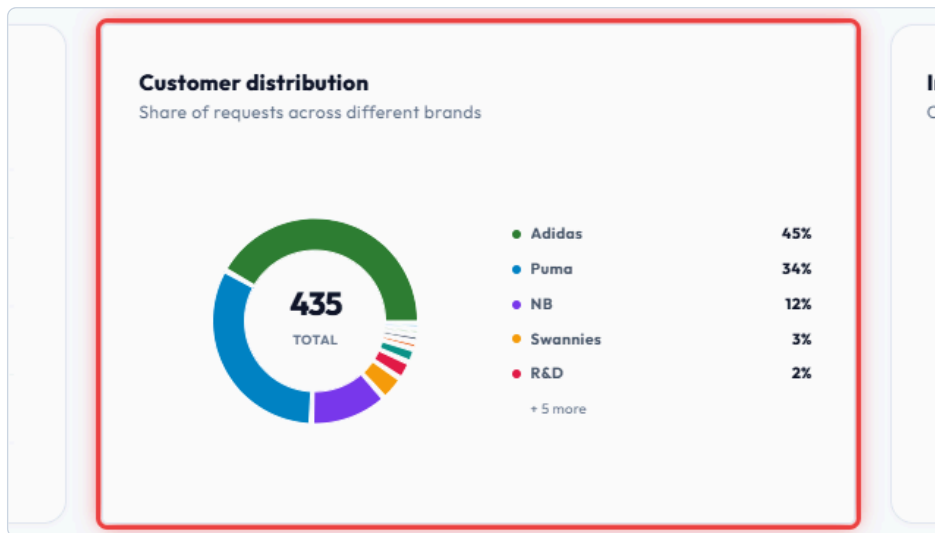

- 2
- Analyze 6 Activity Charts:**

- **Monthly Input** (Distribution of registered requests per month):

- **Customer distribution** (Breakdown of request distribution across different brands):

- The dashboard features 6 dynamically aligned charts reflecting real-time database modifications:

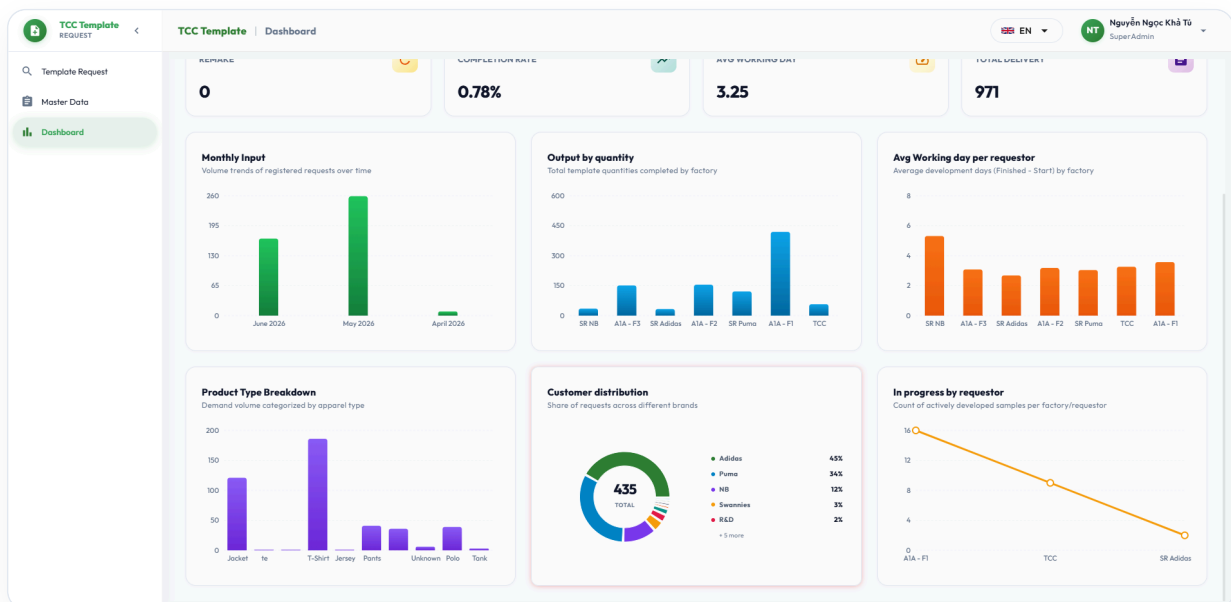

Figure 4.1: High-end charts and KPI dashboards representing pattern maker productivity

5. Advanced Features & Help

- Real-time Synchronization:** Powered by a robust WebSocket server, any progress updates made by technicians are pushed immediately to all active requestor tracking grids and management dashboards without requiring manual page reloads (F5).
- Transparent Audit History:** Every request record tracks audit info showing the last user who updated the record and the exact modification timestamp for verification.
- Account Info & Access Menu:** Users can check security roles, permissions, or execute logout by clicking on their avatar in the top right header:

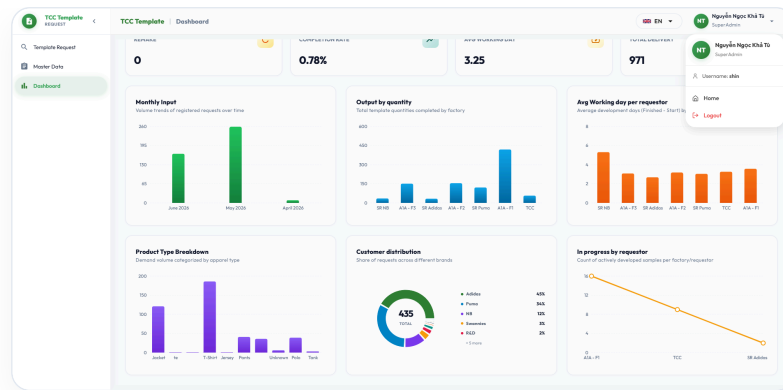

Figure 5.1: Account dropdown menu showing logged employee code and permissions

💡 HELPFUL TIP

Operational Shortcuts: * Instead of clicking the editing icon, double-click any row on the grid list to quickly open its detailed info panel or admin progress drawer. * Export the request list instantly to an Excel-compatible spreadsheet (CSV) by clicking the **Export** button at the top left of the grid.
